

Triunfo Announces its Operational Data – 10M14

São Paulo, November 11, 2014 - Triunfo Participações e Investimentos S.A. (TPIS3), one of the Brazilian companies with the strongest presence in the infrastructure sector, announces its operational data.

Highways Segment

In ten months of 2014, our highway concessions registered traffic of 72.1 million vehicle-equivalents, which represents an increase of 2.0% from the same period of 2013. The individual performance in the same period of our concessionaries Concer, Concepa and Econorte was traffic growth of -1.7%, 6.5% and -0.9%, respectively.

Note that Concer's negative performance reflects the installation of the highway project Arco Metropolitano do Rio de Janeiro. The loss in traffic at Concer due to the project's inauguration was already expected. To maintain the equilibrium of the concession contract, the last amendment signed in August incorporated the effects of this loss into the toll, with the tariff increased by 12.5%, which corresponds to inflation + 5.29%. A second portion of the increase will be applied in the 2015 tariff revision to offset the entire traffic loss caused by the change in the city's highway infrastructure.

At Econorte, vehicle traffic decreased 0.9% due to the slowdown in economic activity and the drop in agricultural production in the region.

Traffic on Highways (Equivalent Vehicles)			
	10M13	10M14	Δ
Concer ('000)	26,731	26,286	-1.7%
